Supporting Our Community
Home-based Transitional and Palliative Care Services can help community members and their families navigate serious illness. Transitional Care provides emotional care and practical support to empower patients who live with serious illness. Palliative Care is specialized medical care that focuses on providing patients with relief from the symptoms and stress of serious illness. Both services are designed to help improve your quality of life.

Transitional and Palliative Care Services are programs of Hospice of Santa Cruz County. For over 42 years, we have provided expert care, guidance, and support when comfort and quality of life matter most.

For a referral to Transitional or Palliative Care Services, talk to your primary doctor or call us directly at (831) 430-3000.

Serving our community from two locations:
The Mary & Richard Solari Center for Compassionate Care 940 Disc Drive Scotts Valley CA 95066
The Borina Family Center for Compassionate Care 65 Nielson Street, Suite 121 Watsonville CA 95076

Transitional Care

Helping you navigate the challenges related to serious illness

How Transitional Care Works
When you have a serious illness, you may face an unfamiliar world of treatment options, doctor’s visits and difficult conversations. We partner with you to evaluate your needs, offer assistance and can link you to valuable community resources.

How We Can Help
A Transitional Care Social Worker will partner with you to help you:

- Make empowered healthcare decisions regarding your care and treatments.
- Provide compassionate, emotional support to assist you in navigating serious illness.
- Connect with resources that fit your needs and help with practical support, financial concerns, and other areas you may be worried about.
- Plan with clarity and make your wishes known by helping you complete your Advance Healthcare Directive or POLST* forms.

“Just knowing that the Palliative Care Team is part of my life is making me feel very cared for.”

Audrey
Palliative Care
Helping ease distress for you and your family

How Palliative Care Works
Understanding your illness can help you make decisions that are right for you and your family. Palliative care provides compassionate support focused on preventing, relieving, and treating your pain and other symptoms. Palliative care is specialized medical care that treats the symptoms and stress of a serious illness. The goal is to improve your quality of life.

We provide an added layer of support alongside your current care team, and help you navigate the complexities of serious illness. We are committed to helping you understand your treatment choices. Palliative care ensures that you, your family, and your caregivers are supported and are working with your goals and wishes in mind.

How We Can Help
Our patient-centered Palliative Care team works together with you, your family, and your other doctors to support and empower you. Close communication is key. This coordinated care and support is provided in the comfort of your home or care facility.

Palliative Care Doctor/Nurse Practitioners: will work closely with you and your primary care doctor to coordinate your care, treat your symptoms and help you maximize your wellbeing and independence. The Palliative Care Doctor or Nurse Practitioner will make home visits and/or video visits as needed.

Palliative Care Nurse: provides education regarding medications, disease processes and symptoms, and care coordination with the rest of your team.

Palliative Care Social Worker: provides emotional and practical support to you and your family. In addition to connecting you to available community resources, the Social Worker can help you complete Advance Directive Paperwork and POLST* forms to ensure your wishes are documented and shared with those involved in your care.

Improving Your Quality of Life
Palliative Care improves quality of life by:

- Respecting your wishes and goals for care and working with you to navigate your options.
- Providing education and recommendations about symptom management.
- Helping you plan for your future healthcare needs.
- Coordinating your care with your health care providers and acting as a connective thread to ensure important details are communicated across your care teams.
- Providing important information about medications and their potential side effects.
- Preventing unscheduled/unplanned trips to the hospital and other services you may not want.
- Identifying when further treatment may be helpful such as skilled nursing care, home health care, or hospice support.

Q: Is Transitional Care right for me?
A: If you or your loved one is undergoing treatment for a serious illness, feel over-whelmed, and could benefit from community resources and support, our Transitional Care Social Worker can help.

Q: What will Transitional Care Services do for me?
A: Your support plan is tailored to match your needs. We are committed to improving your understanding of your treatment options and are here to partner with you to support and empower you.

Q: Can you help my family as well?
A: Yes, we include your family and caregivers to help you navigate your options and next steps.

Q: What is the cost of Transitional Care Services?
A: There is no cost for Transitional Care Services; this program is funded by generous donations from our community.

Q: What is the difference between Transitional and Palliative Care?
A: Transitional Care is provided by our Social Workers and does not include medical team members (Physician, Nurse Practitioner or Nurse).

Q: Why should I choose Palliative Care over Transitional Care?
A: Palliative Care is designed to support adults who have a very serious illness and can benefit from home-based medical and non-medical support. Our Palliative Care Team provides an added layer of support that works in partnership with you and in addition to your primary care provider to support you.

Q: Is Palliative Care the same as Hospice Care?
A: No. Palliative Care patients can continue to receive curative care while receiving Palliative Care. Hospice patients discontinue curative care and elect comfort care instead of continued curative care treatments.

Q: What is the Cost of Palliative Care?
A: Palliative Care is covered by most insurance plans and is based on your diagnosis and needs. Our Palliative Care team will work with you to evaluate your coverage options and payment plans.

Q: How is technology integrated into your services?
A: We have integrated a telehealth application called TapCloud that we use to help facilitate communication with patients who opt into using it. TapCloud is an easy-to-use app providing a secure way for our patients to connect with their care team using secure messaging and video appointments. We use TapCloud to communicate between visits, conduct video visits and keep your care team informed about your current condition.
